Woodward Hydraulic Governor systems can be categorized as UG, SG, PSG, 3161, PG, EGB, EG Actuator and Hydraulic Amplifier sub-products.

UG-8 DIAL GOVERNOR

PSG GOVERNOR

EG-3P / EGP-10P

UG MAS GOVERNOR

3161 TYPE GOVERNOR

EGB TYPE

UG-25+ GOVERNOR

PGA GOVERNOR

EG-1P / 2P

UG40-DI Governor  
Professionalism in  
every step.

While all this equipment is hydraulic, it is of the manual-, remote- or electronically controlled-type. Oil components used in all hydro-mechanically operating governor units for lubrication and tightening processes gradually lose their features, whereas damage begins to be seen on mechanic governor components.

This seemingly minor damage eventually hinders your machine's operation. Moreover, equipment such as O-rings, gaskets, seals, etc. will gradually lose impermeability as they have limited utilization, causing needless oil leakage, whereby governors without oil will incur heavy damage.

To avoid this, as a priority, users should replace governor oil every 1,000 hours, whereas the overhaul process shall be conducted at **Woodward** Authorized Workshops every 16,000 hours. In this manner, governors shall work for years without any failures, just like new.

In cooperating with you within this framework to expedite your governor at scheduled maintenance periods, our workshop is at your disposal.

**Woodward Authorized Independent Service Facility (AISF)**

 WOODWARD

 WOODWARD

Official Service  
Partner of

**SCHALLER**  
AUTOMATION

Schaller systems utilized both on-board ships and the diesel and gas fueled powerplants, all over the world starting from 1000 kW.

**TAMAY** offers service, complete units, upgrades, and spare parts.

#### Schaller Automation - Small unit, big impact

- Protects engines from potential explosion,
- Fast acting - seconds to engine shut down,
- Classification approvals - ABS, CG and more upgrades, and spare parts.

#### Schaller Visatron

- Approved by all relevant classification associations,
- Protects engines with a power range stationing at approximately 2MW,
- Schaller Oil Mist Detectors will be available as fireproof version, soon,
- Access to global Schaller network also on diesel and gas fueled powerplants all over the world starting from 1000 kW. **TAMAY** offers service, complete units, upgrades, and spare parts.

Sale of Complete  
**VISATRON**

Training of oil mist detector  
**Online 24/7**

## Schaller Unit Service

Our workshop  
has become  
known for quick  
repairs and **first  
class service.**

Our goal is to have each and all  
overhauled oil mist detectors  
work as it did brand new.

We have our own **highly  
skilled** service crew for offering  
service and repairs at vessels  
location.

We are always making sure that  
the complete system works  
according to the specified  
instructions of the systems. This  
means that we are checking and  
testing not only the oil mist  
detector but the complete oil  
mist detector installation with  
sampling funnels, tubing  
system, pressure reducer etc.

### Our highly skilled personnel conduct training programs for the crew upon demand.

Regular maintenance services are recommended  
to ensure optimum operation of your equipment.  
Our factory-trained technicians are available 24/7  
to service and repair your Schaller Visatron.

- Routine maintenance: annually or every 6,000 operating hours
- Change air filters every 2 months
- Change pressure regulator filters every 6 months
- Repair or exchange measuring head every 4 years
- On site troubleshooting for unscheduled shutdown

## Recommended Maintenance Schedule

This recommended maintenance schedule is valid for Oil Mist Detector model

VN 115/87	VN 115/87 EMC	VN 115/87 plus	VN 115/93
VN 116/87	VN 116/87 EMC	VN 116/87 plus	VN 116/93
VN 215/87	VN 215/87 EMC	VN 215/87 plus	VN 215/93

Recommended routine maintenance schedules need to be adhered to as described below. Valid for gas operation with TPS turbo chargers, stationary powerplant applications and marine engines.

**Note:**

All maintenance steps should be performed while engine is stopped!

## What to do?

### 1 Procedure

- Check the negative pressure with u-tube manometer. Adjust if necessary. Setting level is 60,00 mmH2O!
- Replace the sintered bronze air filter/fresh air filter (part no.10042) in the measuring head.
- Clean the fresh air bores in the measuring head. Use the cleaning needle (part no. 10135)
- Clean both infrared sensor glasses in the measuring head with cotton pins and technical alcohol.

**EVERY MONTH**

### 2 Procedure

- Replace sintered bronze filter and O-ring in the pressure regulator.

**EVERY 4 MONTH**

### 3 Procedure

- Replace complete service kit on OMD. Clean the inside/outside of base plate.
- Check performance of pressure regulator - replace parts if necessary.
- Clean suction pipes/pipe system and siphon blocks with compressed air.

**YEARLY**

### 4 Procedure

- Replace measuring head by spare unit.

**EVERY 4 YEARS**

## Our Partners

Alphabetical order

### Art Shipyard

Art Shipyard is the new shipyard of Besiktas Group a long established shipping company and market leader in the ship repair industry in Europe. It is located at the heart of the industry in Tuzla bay, which is the traditional ship repair hub of Turkey.

### Besiktas Shipyard

Besiktas Shipyard was established in 2007 in Yalova Turkey as an investment of Besiktas Group. Just in 10 years it gained a global reputation and today it is listed as the 8th most active ship repair yard in the World, ranking 1st place in Europe with over 180 ships docking per annum.

### Desan Shipyard

Desan shipyard is equipped with advanced plasma cutting machines, cranes up to 300 tonnes lifting capacities, fabrication workshops, three floating docks up to post panamax size and berths over 1000m.

### Famagusta Shipyard

Has a floating dock able to provide services to vessels of up to 160 meters x 23,6 meters, light ship up to 8.000 Tonnes, and DWT up to 25.000 T. The shipyard has qualified workshops with a covered area of approximately 1.000 meters square.

### Gemak Shipyard

Exceeding 2000 ships furnished with the services of repair or conversion by Gemak Group since 1969, which is today capable of undertaking 5.500.000 DWT ship repair capacity per annum.

## Our Partners

Alphabetical order

### Kuzey Star Shipyard

Kuzey Star Shipyard Tuzla facility is established on an area of 108.000m2 and has a seafront of 280m. It carries out repair, maintenance and new construction operation with its 2 floating docks, 3 new construction slipways and indoor area of 16.000m2.

### Sefine Shipyard

Founded in 2005 and occupying over 140.000m2 of land for newbuilding, repair-maintenance and conversion. The shipyard is able to undertake ship repair services up to 90.000 DWT on its Post-Panamax size graving dock and up to 120.000 DWT on its Aframax size floating dock.

### Tersan Shipyard

Tersan Group's involvement in Marine Business is not limited with New Building and Ship Repair, Tersan is technical and commercial managing 7 pcs 11K DWT Chemical Tankers in worldwide trade. The basic principles, reliability, customer satisfaction, highest possible quality and hard work.

### TK Tuzla Shipyard

TK Tuzla Shipyard is one of the largest shipyard in Turkey and, throughout its history, it has been identified with remarkable naval work. Located in the Tuzla suburb of Istanbul, north east of the Sea of Marmara at the entrance to the Bosphorus, company provide drydocking, repair and conversion services with fast Turnaround times at competitive prices.

### Yalova Shipyard

Our state-of-the-art facilities include a 217-meter floating dock and a 1500-meter berth for efficient docking and afloat repairs. With a 75,000 m2 yard and a 5000 m2 closed hangar, we accommodate all types of conversions and prefabrications. Our eco-friendly infrastructure integrates renewable energy solutions, advanced waste management, and high-tech systems for seamless project execution, ensuring precision, quality, and sustainability in every service we deliver.
